## Our Core Services

- Liquid Waste Management
- Solid Waste Management
- Compactable Waste management
- Electric Garbage Compactor Services
- Manhole, Tanks & Sewage Pipeline Cleaning
- Supply of Potable & TSE Water

ISO 9001:2015, 14001:2015, 45001:2018

## About Us

ATTC Waste prioritizes sustainability. We offer various waste management services to divert waste from landfills, backed by our experienced staff, reliable equipment, and licensed facilities.

## What we do

We understand that waste management needs differ across businesses. ATTC Waste offers comprehensive removal solutions for all your commercial, industrial, and hazardous waste. Our team is equipped to handle everything from regular office discards to complex industrial byproducts, ensuring safe and compliant disposal for all your waste streams.

## Vision

Driving excellence in sustainable waste management through innovation, efficiency, and compliance, fostering a circular economy for a cleaner future

## Mission

To control Environmental Pollution & reducing the volume of waste by giving awareness to individuals and corporates about their responsibility to implement a Zero Waste plan. To become a part of Qatar Vision 2030

## Why Choose Us

Waste management ensures sustainability, compliance, efficiency, cost reduction, resource optimization, and environmental protection through recycling and waste-to-energy solutions.

## Waste Management Services

- Sewage Water Removal
- Manholes, Tanks & Sewage Pipeline Cleaning
- Compactable Waste Removal
- Electric Garbage Compactor Services
- Non-Hazardous Waste Removal
- Construction Waste Removal
- Oily Mix Water Removal
- High Pressure Jetting Tanker Services

## Other Related Services

- Supply of Potable Water
- Supply of TSE Water
- Supply of Building Materials like Dune Sand, Washed Sand, Aggregate etc.
- Supply of Flatbed Trailer
- Supply of Dump Truck & Trailer
- Supply of Boom Truck. 3 Ton Pickup

Don't let waste management become a burden for your business. ATTC Waste provides a one-stop solution for all your commercial, industrial, and even hazardous waste removal needs. Our experienced team ensures safe, compliant disposal, allowing you to focus on what matters most – your core operations.

## ATTC WASTE RECYCLING

ATTC understands Qatar's vision in terms of recycling waste and decided to pull out of our efforts in supporting it. The common waste materials that have the potential to be reused as raw materials, can reduce energy consumption, reduce pollution, reduce demands, from used materials, reducing the need for waste disposal. Processing used materials (waste) into new useful products.

ATTC has its proven systems in place for waste recycling. Waste area segregated for recycling from the yard and can for recycling. From the total waste only, only 10% or less will be the free for disposal and landfills:

The reason why recycling is so important it prevent pollution, reduces the need for harvest raw materials, saves energy, reduces greenhouse gas emissions, reduces the amount of waste that ends up in landfills, and allows products to be used to the fullest extent.

## SOLID WASTE MANAGEMENT

We are providing high quality services to solid waste management. We have food waste removal, domestic waste removal & non hazardous waste removal services, We fully equipped for solid form compactors, skip loaders hook lift trucks and boom trucks to collect & dispose wastes services effective. We have our own garbage bins, 7 CBM skips, 20 CBM Roft bins and electric stationary compactors.

Our skip-removal services cost effective. We handle selection of household or industrial waste in a professional in ally, Aux Workers are well trained, skilled and efficient to run the job within the time frame, We supply how to handle the job in the simplest to start and the work on stipulated tax.

SERVICES

## PIPELINES AND SEWER NETWORK CLEANING SERVICES

We conduct high-pressure cleaning and flushing of sewer lines using specialized combo trucks capable for the cleaning of sewer networks. We have high pressure Jetting tankers, super suckers, Combination Units & hydro-jets. These machines are equipped with water recycling systems which significantly reduce usage of fresh water necessary for the high pressure cleaning and flushing of sewer pipes. Sewer pipe cleaning vehicles are truck-mounted and hydraulically-operated, designed to do various jobs. Our Staffs are fully compliant, trained and experienced for carrying out their duties at Pipeline Monitoring Services and High Pressure Cleaning, Unblocking Drains, Manhole Cleaning, Grease Trap Cleaning, rain water gullies & soak way cleaning etc. in a safe and professional manner. Sewer cleaning methods described as hydraulic rely on the cleansing action caused by high velocities of water in the line can effectively remove grease, sand, and other debris.

With a decade of experience in liquid waste management, we are currently one of the most recommended companies offering removal of sewage in the State of Qatar.

AL-TDKHL being equipped with a fleet of well-maintained tankers specialized in transportation and disposal of liquid waste in Qatar. We strictly comply with the standards stipulated by the local authorities. We operate our own fleet of vacuum tankers with high pressure compressors. We own more than 90 tankers in our fleet. We have vacuum tankers with different capacities range from 3000 gallons to 6000 gallons with the capability for suction up to 10 meters. This gives simply the distinct advantage to cope with the demand of both domestic and commercial customers. We are following instructions as per the ashghal standards & disposing the waste water at ashghal approved STP's in the state of Qatar.

## SERVICES

### POTABLE WATER

AL-TDKHL is committed to Supply Potable water for usage mainly in construction sites and other industrial requirements. Our tankers are fitted with water pumps to speed up loading and unloading. They are regularly checked as part of the general vehicle maintenance programme according to the Qatar traffic regulation to monitor the operational efficiency. We store Hoses and related couplings in a sealed container to protect them from contamination.

Qatar General Electricity and Water Corporation (Kahramaa) has made the task easy for its citizens or residents as we don't have to do much more anything to check the quality of drinking water. We get our tankers fill with potable water through the reservoirs of Kahramaa.

### TSE WATER SERVICES

Treated sewage effluent (TSE) Water has tremendous potential in supplementing the ever-growing water demand. We supply TSE water to our customers and clients with best price as per their requirement.

It is economical and consumes less energy compared to potable water. It is used in industrial and agriculture sectors to reduce the usage of desalinated water. TSE is used for landscaping and irrigation drought tolerant plants (xerophytes), and particularly native species.

## SERVICES

### STEEL & RAW MATERIAL TRANSPORTATION SERVICES

AL-TDKHL Transport & Contracting provides transportation services of Steels and earth-work materials such as washed sand, Dune sand, Back-fill Materials, Raw clay, Lime stone and Gabbro aggregates Road base (Sub-base) Class A,B,C. and for these Purposes our fleet of dump trucks & trailers are working 24/7 basis. We also rent our dump trucks and trailers as well as supplies high quality dune sand for all construction purposes, using natural deposits.
